EDUCATIONAL INFOGRAPHICS

Hot peppers in your food, though very tasty, cannot prevent or cure COVID-19.

The best way to protect yourself against the new coronavirus is to keep at least 1 metre away from others and to wash your hands frequently and thoroughly. It is also beneficial for your general health to maintain a balanced diet, stay well hydrated, exercise regularly and sleep well.

FACT:
Adding pepper to your soup or other meals **DOES NOT** prevent or cure COVID-19.

 World Health Organization #Coronavirus #COVID19

27 April 2020

Do not under any circumstance spray or introduce bleach or any other disinfectant into your body. These substances can be poisonous if ingested and cause irritation and damage to your skin and eyes.

Bleach and disinfectant should be used carefully to disinfect surfaces only.

Remember to keep chlorine (bleach) and other disinfectants out of the reach of children.

 World Health Organization #COVID19 #coronavirus

FACT:
Spraying or introducing bleach or another disinfectant into your body **WILL NOT** protect you against COVID-19 and can be dangerous

27 April 2020
